2. Enrolment

Enrolment Trend over Last Five Years

Enrolment for Kachi to Grade 12 students in all the public schools of Punjab is 12,268,981 in 2017 – showing 9.1% increase over last year and 13.5% increase over last 5 years. The ratio of male to female students has stayed around 52:48 over this period.
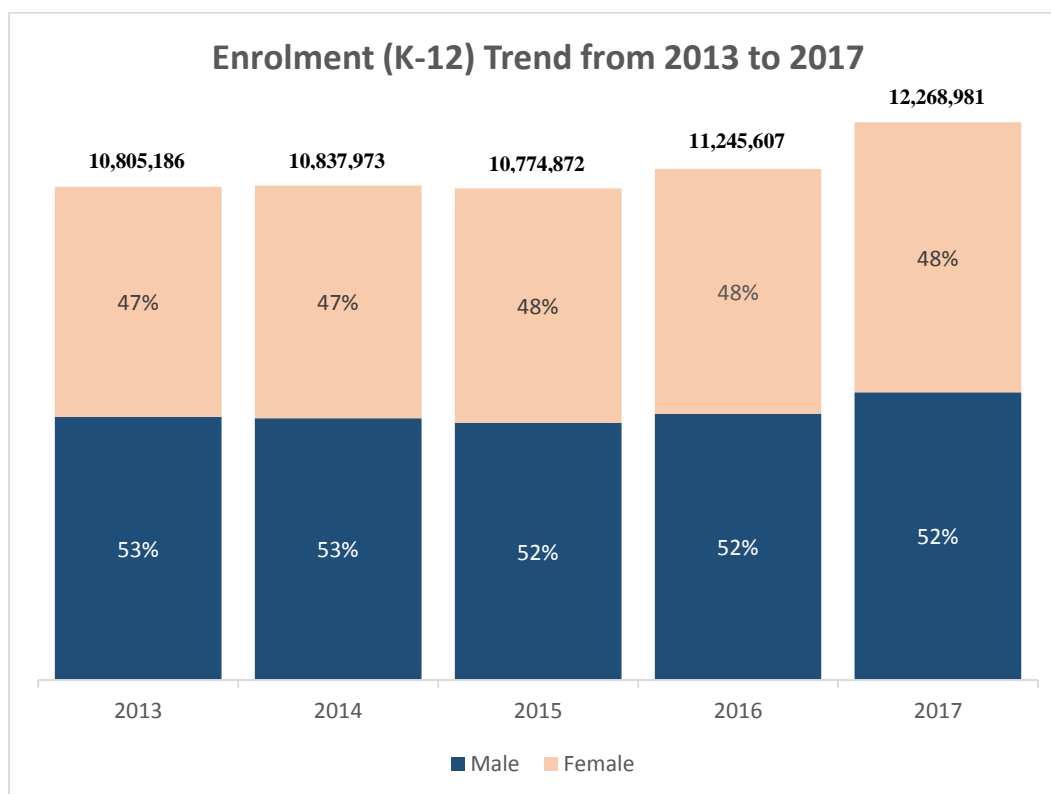

Figure 1: Enrolment (K-12) Trend from 2013 to 2017

Level-wise Enrolment

Primary has the highest proportion of students, more than 8 million. However, enrolment significantly drops with an increase in level of education. Primary and Higher Secondary have shown a significant increase in enrolment over last year, 10.6% and 28.1% respectively. Over the last 5 years, the enrolment for Primary, Secondary and Higher Secondary has increased by more than 14.4%, 20.4% and 54.3% respectively.

Level	2017	Change since last year	Change over last 5 years

Table 1: School Level-wise Enrolment

Grade-wise Enrolment

Kachi has the highest enrolment, comprising close to 20% of the total enrolment. Enrolment consistently declines with an increase in Grade, except Grade 9 in which enrolment is greater than Grade 8. Enrolment at the Higher Secondary level (Grades 11 & 12) comprises just 1% of total enrolment. Except for Higher Secondary, the proportion of female students is slightly lower than that of male students in each Grade.
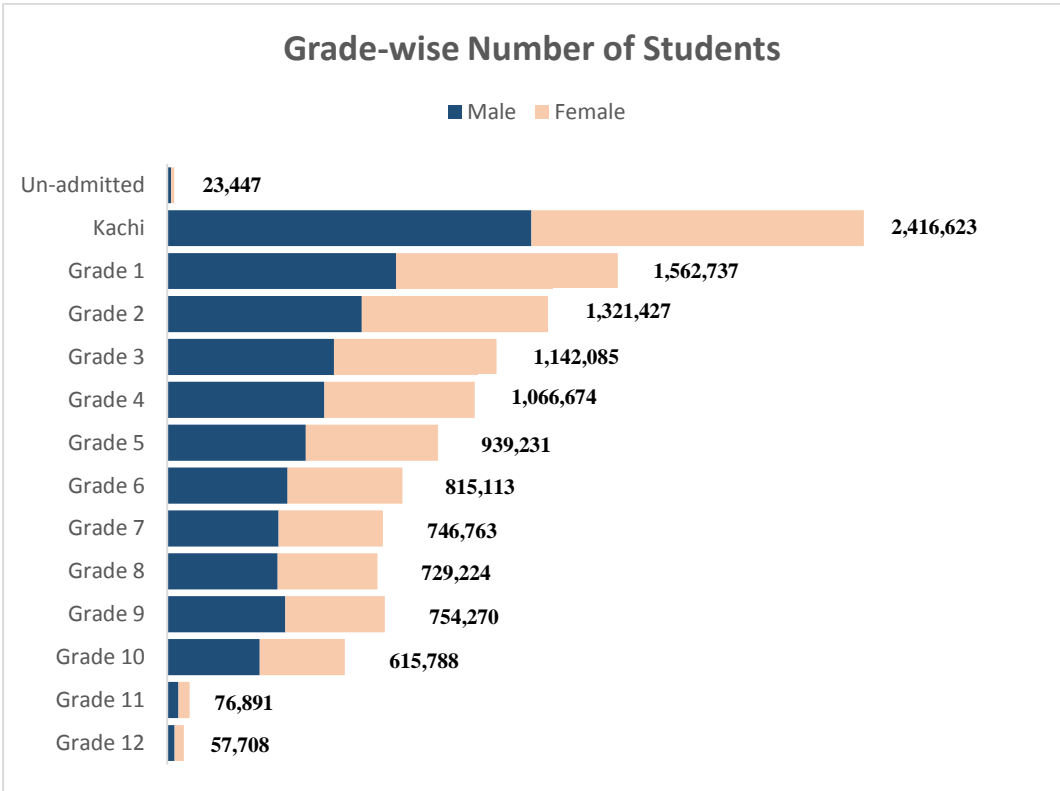

Figure 2: Grade-wise Number of Students

Specialisation-wise Enrolment in Secondary

Close to 75% of the Secondary students specialize in Science. More than 60% of the Science students are male whereas more than two-third of the Arts students are female. The number of students studying Computer Science and Biology are 342,550 and 581,743 respectively.

Figure 3: Specialisation-wise Enrolment in Secondary

Specialisation-wise Enrolment in Higher Secondary

More than half of the Higher Secondary students specialize in Arts and majority of them are female. Pre-Medical and ICS each comprise 15% of Higher Secondary students.

5. Available Facilities

Trend of Basic Facilities over Last Five Years

The percentage of schools with basic facilities has significantly improved over the last 5 years. Currently, more than 99% schools have drinking water and toilets, 96% schools have electricity and 98% schools have boundary walls.
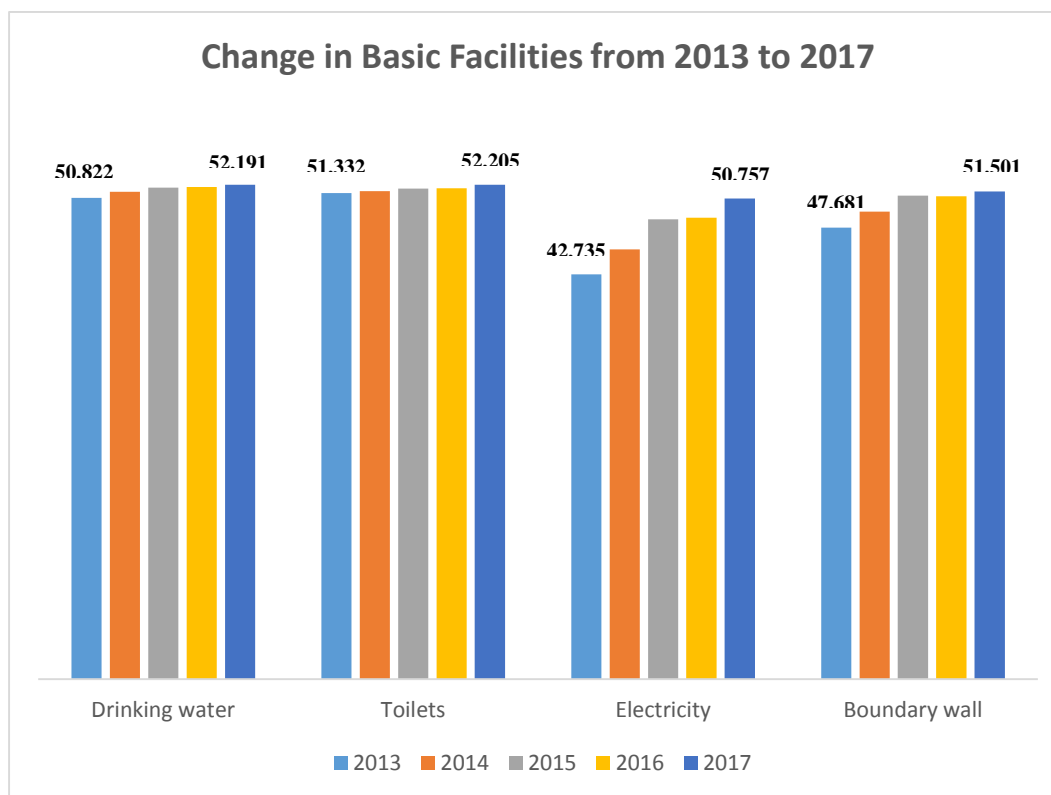

Figure 9: Change in Basic Facilities from 2013 to 2017

Availability of All Facilities

More than 96% of the schools have basic facilities (drinking water, toilets, electricity and boundary wall). More than 97% of the schools have main gate while more than 89% of the schools have sewerage facility. However, other facilities such as playground and library, 61% and 24% respectively, are lacking in schools. Computer labs, Science labs and ECE Classrooms are significantly lacking in schools as less than 15% of the schools have each of these.

6. Ratios

Student-Teacher Ratio (STR)

This is the ratio of the number of students to the number of teachers in a school. As per the criteria approved by the School Education Department, this ratio should not be more than 40:1. The overall ratio in 2017 is around 30 students per teacher. However, the ratio is high at the Primary level (37.8), indicating that close to 38 students are taught by a Primary School Teacher.

Level	STR
Primary	37.8
Elementary	21.0
Secondary	28.2
Higher Secondary	21.1
Overall	**30.4**

Student-Classroom Ratio (SCR)

This is the ratio of the number of students to the number of classrooms in a school. As per the criteria approved by the School Education Department, this ratio should not be more than 40:1. The overall ratio in 2017 is 46.0 - slightly more than the maximum threshold. The ratio is very high at the Secondary and High Secondary levels, 51.4 and 56.9 respectively.

Level	SCR
Primary	43.1
Elementary	41.3
Secondary	51.4
Higher Secondary	56.9
Overall	**46.0**

Dropout Rate

According to The UNESCO Institute of Statistics (2017), Dropout Rate is the "proportion of pupils from a cohort enrolled in a given grade at a given school year who are no longer enrolled in the following school year" (p. 1)[1].

The analysis reveals that only Grades 4 & 9 have a negative dropout rate, showing that students have dropped out from all other grades. Grades 1 & 10 have the highest dropout rates of 30% and 13% respectively. The dropout rate of males is generally higher than that of females.

Level	Male	Female	Overall
Grade 1	31.5%	28.4%	30.0%
Grade 2	2.0%	1.2%	1.6%
Grade 3	8.2%	6.3%	7.3%
Grade 4	-2.2%	-1.9%	-2.1%
Grade 5	6.3%	3.6%	5.0%
Grade 6	2.6%	0.4%	1.5%
Grade 7	2.4%	-1.0%	0.8%
Grade 8	1.2%	-1.1%	0.1%
Grade 9	-12.0%	-9.4%	-10.8%
Grade 10	18.4%	7.8%	13.6%

Table 16: Dropout Rate

Survival Rate to the Last Grade of Primary Education

According to World Bank, Survival Rate is "the percentage of children enrolled in the first grade of primary school who eventually reach the last grade of primary education" (p. 2)[2].

The Survival Rate in 2017 is 72%, meaning that only 72% of the students in Grade 1 in 2013 are now enrolled in Grade 5 in 2017. Survival rate is 70% for males and 73% for females.

Transition Rate

According to The UNESCO Institute of Statistics (2017), Transition Rate is the "number of students admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of students enrolled in the final grade of the lower level of education in the previous year" (p. 1)[3].

Transition Rate from Primary to Elementary is close to 100%, meaning that almost all the students in Grade 5 in 2016 transitioned to Grade 6 in 2017. Transition Rate from Elementary to Secondary is slightly above 100%, indicating that there was new enrolment in Grade 9 as well. The transition rate is very low from Secondary to High Secondary - less than 15% of the students transitioned in 2017.

Level	Male	Female	Overall
Primary to Elementary	97.4%	99.6%	98.5%
Elementary to Secondary	112.0%	109.4%	110.8%
Secondary to Higher Secondary	12.5%	14.5%	13.4%
