Punjab Development Statistics

**BUREAU OF STATISTICS
GOVERNMENT OF THE PUNJAB
LAHORE**

P R E F A C E

Bureau of Statistics has been issuing this publication since 1969. Prior to 1972, it used to be a quarterly publication but it was made an annual one since 1972. It contains information mostly for the province of the Punjab, but information relating to Population, Housing, Prices, National Accounts, Banking, Foreign Trade, Electricity, Pakistan Railways and PIA has been given at Pakistan level. It also contains a 'Statistical Abstract' which gives a comparative data picture of almost all socio-economic sectors of Pakistan and the Punjab.

The present edition is the 14th annual one of the series for the Punjab. It contains latest data on almost all socio-economic aspects of the province with their break-down by administrative units viz. Tehsil, District and Division, as far as possible. Keeping in view the data requirements of the users, the scope of this edition has been further broadened by including additional information in some important sectors viz Education, Industry and Population. These additions are expected to further enhance the utility of this publication. Explanatory notes defining statistical terms and concepts, scope, collection and compilation procedures and limitations of data have been incorporated to make the bulletin more informative and useful. Source of data has been indicated at the end of each table.

The co-operation extended by various Federal and Provincial Organizations and Autonomous Bodies in supplying the information is gratefully acknowledged.

Bureau will welcome comments and suggestions for improving format and contents of its future issues.

EXPLANATORY NOTES ON AGRICULTURE SECTION

A- Meteorology

This sub-section includes minimum and maximum temperatures at selected stations for the months of March, April, September & October, 1986, yearly rainfall data from 1977 to 1986 and monthly data for 1986. The rainfall at the specified stations is recorded in millimeters instead of inches & cents (1" = 25.4 Millimeters) at 0500, 0800 and 1700 Hrs. PST daily by the Meteorological Observatories. The Meteorological Observers record not only rainfall but also many other Meteorological elements like Air Pressure, Temperature (Maximum & Minimum), Dry & Wet bulb temperature, Humidity, Dew Point Temp., Horizontal visibility, clouds, wind (Direction & Velocity) and other important weather phenomena like Thunder - Storm, Lightening, Duststorm, Hailstorm, Fog, Mist, etc. After recording all the Meteorological data at hours mentioned above in the Daily Pocket Register, the Meteorological Observatories transmit telegraphically these data, in coded form, to Meteorological Office, Lahore Airport. The Meteorological Office utilise these data to issue daily weather forecast. These data are also published in the Regional Daily Weather Report which is issued by the Meteorological Office, Lahore Airport.

2. The Meteorological Observations recorded daily at different hours are copied by the Observers in Monthly Meteorological Register and this Register is sent to Regional Centre at 46-Gulberg Road, Lahore in the first week of each succeeding month. These Registers are then thoroughly scrutinized by the trained Meteorological Staff at Lahore and necessary corrections are applied, where necessary.

3. The sums and averages and extreme (maximum & minimum) values of all the Meteorological Observations are also worked out by the scrutinising staff. On the basis of these monthly values over a long period of 30 years the normal values are worked out.

B- Agriculture

I. This sub-section includes data for the years 1975-76 to 1985-86 on the following topics:-

1. Land Utilization;
2. Agricultural Farms;
3. Agricultural Inputs (Temperature, Rainfall, Canal Withdrawals, Sales, Nutrients per Lb. and Prices of Fertilizers, Distribution of Improved Seeds, Procurement of Pesticides and Area Treated with Pesticides);
4. Tubewells Installed, Electrified and Pumping in SCARPS' Areas; their Pumpage Capacity and Actual Pumpages;
5. Tractors by Ownership and Imports of Tractors;
6. Agricultural Institutional Credit;

7. Cropped Area Irrigated by Different Modes of Irrigation, Total Area Sown under various Crops (Total and Irrigated) and Area Failed;
8. Production and Per Hectare Yield of Important Crops, Area and Production of Various Oil Seeds, Fruits and Other Minor Crops &
9. Saline Area and Water Table Depths.

Data for this sub-section have been collected from various sources indicated in the Tables.

II. The collection and compilation of Land Utilization, Crop Acreage and Production data are explained below:-

i). Land Utilization:

Land Utilization Statistics are compiled by the Statistical Wing of the Agriculture Department. These Statistics are compiled from the District-Wise information supplied annually by the Deputy Commissioners which is based upon summarisation of crop inspection data entered in Form-I of "Lal Kitab" of each Revenue Estate.

Definitions of the terms used in the Land Utilization Statistics are given below:-

1. Current Fallow:

Comprises land which was not cultivated throughout the year, but was cultivated for at least one season during the preceding year.

2. Culturable Waste:

Comprises the cultivable land left uncultivated for four consecutive harvests.

3. Area not available for cultivation:

Includes barren or mountaneous land, area under roads, canals, rivers, sites of villages and houses and all such areas which are devoted to use other than Agriculture.

4. Area not reported:

Comprises the balance of the geographical area which has not been surveyed cadastrally and reported area.

ii) Area under Crops:

Census of Crop Acreage is conducted by the Revenue Patwaries, twice a year, one for Kharif Season and other for Rabi Season in 25295 Mauzas of the

Punjab Province. The Mauza-wise Crop Acreage Returns (Goshwara Jinswars) prepared manually by the Patwaries, are collected by the Bureau of Statistics, through 86 Tehsildars. These returns are checked by the Bureau for completeness of coverage, edited, coded and punched. Credibility checks are applied at mauza level with the help of the Computer Errors of coverage, recording and processing the data are thus minimized and the quality of Crop Acreages Statistics is improved. These statistics are utilized by the Agriculture Department in the preparation of final production estimates. It may, however, be mentioned that 'Zaid Rabi' crops like Tobacco and Onions are not fully covered through this census as separate crop inspection is carried for these crops. The manually compiled acreage of these crops by the Revenue staff is, therefore, used for preparation of the final estimates of these crops.

iii) Production of Crops:

For Wheat, Cotton, Rice, Maize and Sugarcane, the Agriculture Department conducts Random Crop-Cutting Surveys. The observed data of these Surveys are edited in the light of available data on weather conditions, availability of water, use of fertilizers and other agricultural inputs. The Survey Estimates of yield-rates are then modified and utilized to prepare 'Official' production Estimates.

For other crops, the yield-rates are estimated on the basis of 'Eye-Estimates' of the field staff of both the Revenue and Agriculture Departments. The subjective yield-rates are then applied to estimate the 'Official' estimates of total out-turn of the remaining crops.

III. Limitations:

The timely availability of statistics depends on two factors, first, the receipt of reports from the Field Staff and secondly, their tabulation at the Provincial level. As far as the acreage under all crops is concerned, the Bureau of Statistics has been trying to reduce the time-lag by collecting Goshwara Jinswars directly from the Revenue Field Staff and by minimizing the tabulation time. The centralized collection & tabulation has reduced tabulation time appreciably.

- ii) Most of agricultural statistics are by-products of the administrative activities of the Revenue Department. Since the collection of Statistics is not primary aim of the Revenue Department, the system has not provided for quality control on statistics derived from its records. The compilation of figures at all levels is done manually which undoubtedly contains errors of coverage, classifications, summations etc.

IV. Kharif and Rabi Crop Seasons run from April to September and October to March respectively.

V. Canal Withdrawals Data:

For reporting Canal Withdrawals data, the canals have been grouped together as under

a) On the basis of the designed capacity and 20 working hours per tubewell per day for six months.

b) On the basis of existing capacity and actual working hours for six months.

c) Fall in actual pumpage in Rabi Season during 1980-81 is due to decrease in working hours of tubewells.

- a) The figures of number of Co-operative Societies, membership, loans advanced and loans received have considerably increased during this year simply for the reason that Crash Programme was started in seven selected districts, additional staff was appointed with the view that no village in crash districts should be left without Co-operative Societies. An interest-free loan to the tune of Rs.200,00 million was provided exclusively for supply of fertilizer during the year 1978-79.
- b) Sharp rise in number of Agricultural Co-operative Societies is simply due to special efforts by the Department to keep no village without a co-operative society in the Punjab.
- c) Sharp increase in the Agricultural Credit through Co-operative Societies is due to the Government policy to advance interest-free loans to the farmers.

Note:- Most of the data have been revised by the source-agency.

Note:- Survey and Research Organization, Planning Division, WAPDA, Lahore has undertaken "Soil Salinity and Water Table Survey" of 41.3 million acres (16.711 million Hectares) of Canal commanded area in Indus Basin Plains. The above Table contains information collected through this Survey. The province-wise break-up of the Surveyed area is: Punjab 25.117 million acres (60.8%), Sind 13.786 million acres (33.4%), Baluchistan 0.873 million acres (2.1%) & N.W.F.P. 1.517 million acres (3.7%).

Definitions:

A - Surface Salinity

i) Salt Free Area:

There are no visible salts on the soil surface and plant growth is not affected by salinity/sodicity. The electrical conductivity of the surface crust measures upto 4 m.mhos/cm at 25°C.

ii) Slightly Salt Affected Area: The plant growth may be uneven or patchy. The electrical conductivity of the surface soil ranges between 4 to 8 m.mhos/cm at 25°C.

iii) Moderately Salt Affected Area: The plant growth on these soils is very patchy. The electrical conductivity of the surface layer varies from 8 to 15 m.mhos/cm at 25°C. The salts are fairly visible on the soil surface.

- iv) Strongly Salt Affected Area: The area lies unused and supports some wild salt tolerant plants. The electrical conductivity of the surface soil is more than 15 m.mhos/cm at 25°C.

B. Profile Salinity

- i) Non-Saline Non-Sodic Soils (Normal): These soils have electrical conductivity of the saturation extract of less than 4 m.mhos/cm at 25°C and SAR less than 13. Such soils have neither salinity nor sodicity at any depth of the soil profile.
- ii) Saline Non-Sodic Soils: These soils have electrical conductivity of the saturation extract more than 4 m.mhos/cm at 25°C and SAR below 13. The soils are classified as saline but non-sodic, when only salts are present without sodicity at any depth of the soil profile.
- iii) Saline Sodic Soils: Saline-Sodic soils have electrical conductivity of the saturation extract more than 4 m.mhos/cm at 25°C and SAR more than 13. The soils are categorised as saline sodic, when both salinity and sodicity are present at any depth of the soil profile.
- iv) Non-Saline Sodic Soils: These soils have electrical conductivity of saturation extract less than 4 m.mhos/cm at 25°C and SAR more than 13. The soils are classified as non-saline sodic, when only sodicity is present without salinity at any depth of the soil profile.

C. Miscellaneous Land Types

The area included in this category represents unclassified area being under towns, villages, settlements, factories, airports, cemeteries, under-water etc. or being inaccessible.

D. Missing Data

It pertains to soil samples that could not be taken due to presence of a high water table or a soil material being too dry, sandy or gravelly to be picked up by the auger. Sample destroyed during transit or in laboratory and those during transportation totally or partially to the extent that the quantity left was too insufficient to perform the requisite analysis are also included. Majority of the missing data in the lower depths is because of the fact that the soil samples could not originally be taken especially due to occurrence of a high water table.

a) Include Special Development Programme's (SDP) Mosque Schools.

b) Decline in the number, enrolment and teaching staff of primary schools in 1985-86 is due to re-organization of mosque schools/maktabas as a result of their transfer from administrative control of Project Director, Special Development Programme (SDP) for Primary Education to the administrative control of DEOs (Male).

c) Decline is due to the exclusion of 12 un-recognized non-Government Schools.

Note:- i) The information in respect of number, enrolment and teaching staff of primary, middle and high schools for the years 1975-76 to 1980-81 as collected and supplied by the Bureau of Education, Lahore was presented on financial year basis and pertained to the last month of the related year. For example, the information for the year 1980-81 related to 30th June, 1981. Subsequent to the year 1980-81, the data for the year 1982-83 as collected by Bureau of Statistics have been presented on academic year basis and refer to 31st May of the year 1982. As such there is no discontinuity in the time series in terms of reference date. However, the financial year has been redesignated as academic year.

ii) This table excludes Federal Government Schools at Islamabad.

The Punjab: 1972 and 1981 Censuses

Sex \ Area	All Areas		Urban Areas		Rural Areas	
	1972	1981	1972	1981	1972	1981
Total	20.7	27.4	38.9	46.7	14.7	20.0
Male	29.1	36.8	47.8	55.2	22.9	29.6
Female	10.7	16.8	28.0	36.7	5.2	9.4

Note:- While comparing the literacy ratios from the 1972 and 1981 Censuses it may be pertinent to indicate that the question on literacy in two censuses was worded differently. In the 1972 Census it was enquired whether a person can "read and write with understanding". In the 1981 Census a more practical question was asked i.e., "Whether a person can read a newspaper and write a simple letter".

EXPLANATORY NOTES
ON
FISHERIES SECTION

Table on Fisheries sector contains data on fish production (Quantity & Value) during the years 1979-80 to 1985-86. These data have been compiled on the basis of fish catches marketing recorded by the field staff of Fisheries Department in various districts of the Province. The annual price of commodity is calculated by taking the average of minimum and maximum transactions of different lots of fish in each month.

LIMITATIONS

1. There is no Marketing Act to regulate the sale of fish in the Province.
2. At the primary marketing stage, the fish is not graded. The fish is exposed for sale by Arthis (Brokers) in different lots according to weight and freshness of catches, irrespective of various species. The specimen with better individual weight and having comparatively better freshness normally fetch better price. There is often considerable variation in the wholesale price of different lots in the same market.
3. The conceptual basis of price is not uniform in different markets of the Province.
4. The staff responsible for collection of prices are not statistics-oriented. The prices are usually under-reported.

STEPS FOR IMPROVEMENT

The infra-structural organization of the department is being suitably strengthened to ensure reliable collection of statistical data. Special orientation courses are also likely to be organized in the Fisheries Training Centre for the in-service personnel to acquaint with the necessary technical-know-how in relation to collection of statistical data.

EXPLANATORY NOTES
ON
FOODGRAINS STATISTICS SECTION

This section includes data on the following topics:-

1. Procurement of Wheat by Food Department on Voluntary basis by Districts.
2. Procurement of Wheat by PASSCO on Voluntary basis.
3. Wheat Imports.
4. Releases of Wheat from Provincial Reserves.
5. Stocks of Wheat in Provincial Reserves.
6. Available Foodgrains Storage Capacity.
7. Sugar Production, Consumption and Stocks.

These data are supplied by the District Offices of the Food Department on the basis of records maintained by them. Wheat offered voluntarily by growers, zamindars, traders, agents etc., is purchased at the procurement Price fixed by the Government at the Procurement Centres established by the Food Department and PASSCO for the purpose.

Releases of wheat from Government Reserves mainly relate to the wheat issued to Roller Flour Mills for milling and sale to consumers through fair price shops at fixed prices. Wheat is also released to Roller Flour Mills to supplement the supplies of wheat flour available in the open market. These releases are issued as a measure to stabilize open market prices of wheat and wheat atta.

Stocks of wheat on the 1st of every month indicate the size of buffer stocks maintained by the Government as a level against rise in prices of wheat and wheat atta in the market.

The Wheat procurement year runs from May to April following the harvesting of wheat of previous Rabi Season and the Sugar production season runs from October to June.

EXPLANATORY NOTES
ON
FOREIGN TRADE SECTION

Foreign trade statistics refer to the movement of goods into and out of the customs area of Pakistan and include imports, exports and re-exports carried through sea, land and air routes but exclude Afghan Trade in-Transit.

2. Exports statistics represent movement of goods out of Pakistan to foreign countries, Re-exports statistics cover imported goods subsequently exported without further processing. Exports include bunker fuels supplied to ships and aircrafts and also goods sent by letter and parcel post. The figures exclude dutiable and non-dutiable articles of baggage and personal effects of passengers, trade in-Transit through Pakistan, gold and silver coins or bullion and currency notes and defence stores.

3. Statistics of imports represent the arrival into Pakistan of goods from foreign countries released by customs authorities either directly or from bonded ware-houses and intended for home consumption or for re-exportation. Imports also include goods brought in by foreign diplomatic missions, goods salvaged from or disposed of by ships in mid-stream and articles received through letter and parcel post. Exported goods, if any, subsequently re-imported from foreign countries without any processing have been excluded from imports. The figures are exclusive of imports into bond, defence stores, gold and silver coins or bullion, foreign currency notes, dutiable or non-dutiable articles of baggage and personal effects of passengers and transit trade through Pakistan.

4. The sources of information are the shipping bills and bills of entry for sea and airborne trade filed with customs authorities and weekly or fortnightly returns from various land stations. Exports are recorded of f.o.b. while imports are valued c.i.f.

5. Commodities of export and import are classified on the basis of Pakistan Standard Trade Classification (PSTC) which is an adaptation of UN Statistical International Trade Classification.

6. For direction of trade, countries have been mainly classified by geographical areas. Exceptions are European Economic Community (EEC), Regional Cooperation for Development (RCD) and European Free-Trade Area.

EXPLANATORY NOTES ON FOREST STATISTICS SECTION

The data included in this Section cover the designated forest areas by legal status and the out-turn and value of timber & firewood produced from the same.

I. DESIGNATED FOREST AREAS

These include all the wooded and non-wooded areas and the barren lands which are under the administrative control of the Punjab Forest Department for the afforestation and management purposes. It includes all the coniferous forests, scrub forests, riverian forests, irrigated plantations, linear plantations and range lands.

The brief definitions of the categories of the Forest areas by legal status are:-

i) RESERVED FORESTS

The forest area under the control of the Forest Department declared as Reserved Forest under the Forest Act, 1927. The rights and privileges are normally limited and settled.

ii) PROTECTED FORESTS

The forest area under the control of Forest Department which has been declared as protected Forest under the provision of Forest Act, 1927.

iii) UN-CLASSIFIED FORESTS

The Government Forests which are neither Reserved Forests nor Protected Forests.

iv) SECTION - 38 AREA

Private land area handed over voluntarily by the owners to the Forest Department for management under Section-38 of Forest Act, 1927.

v) CHOS ACT AREA

Lands taken up for soil and water conservation under the Chos Act.

vi) RESUMED LANDS

Land taken over by Government under various Reforms or Martial Law Regulations.

vii) GUZARA FORESTS

The Forest area which are the joint property of the villagers and are being managed presently by the Forest Department.

II. Definitions of some other important items are given below:-

i) CONIFEROUS FORESTS

Forests of cone bearing trees with usually needle like leaves mostly occurring in the hilly areas at elevation of above 3500 feet the sea level.

ii) COMPACT FORESTS

Forests which are grown in the shape of blocks of trees in the irrigated plains or along the banks of rivers.

iii) LINEAR PLANTATION

Rows of trees planted in the landstrips alongside canals, highways and railway lines.

iv) RANGE LANDS

All lands producing native forage for animal consumption to provide a forage cover that is managed like native vegetation; generally considered as land that is not cultivated.

III. PRODUCTION AND VALUE OF TIMBER & FIREWOOD.

The information about the production and value of timber and firewood relates to Forest Department managed forests.

EXPLANATORY NOTES
ON
FUEL AND POWER SECTION

This section includes data on the following topics:-

1. Gas Consumption by Consumer Groups
2. Installed Generating Capacity of Power Stations, National Grid, WAPDA
3. New Electricity Connections Given and Applications Pending with WAPDA by Consumer Groups
4. Electricity Consumers and Units Sold by Categories, WAPDA System
5. Electricity Revenue Assessed by Type of Consumers, WAPDA
6. Generation of Energy in Pakistan and the Punjab under WAPDA System
7. Villages Electrified by Provinces.

II) Definitions of important terms used in this section are as under:-

1. Principal Hydro:

The power Stations utilising water heads available at the Dams come under Principal Hydro. The prime movers of the generators are run by discharging water through water turbines.

2. Small Hydro:

The Power stations utilising water heads available from the small Dams across canals come under small Hydro. The prime movers of the generators are run by discharging water through water turbines.

3. Thermal :

Thermal stations are based on steam turbines utilising steam raised in boilers using Sui Gas as a fuel in the boilers.

4. Gas:

Unlike the conventional thermal stations, natural (Sui) Gas is burnt and this expanded directly in the gas turbines which is prime mover for the generators.

5. Diesel:

Conventional Diesel Engines using high speed diesel oil are used as prime movers for the generators.

6. Domestic:

General Supply for the purpose of this Tariff, means a supply for lamps, fans and other single phase appliances such as heaters, cookers, radiators, airconditioners, refrigerators and domestic tubewells etc. The rated capacity of any motor used in such appliances shall not, however, exceed 4 kilowatts.

7. Commercial:

General supply for the purpose of this Tariff, means a supply for lamps, fans and other single phase appliances such as heaters, cookers, radiators, airconditioners, refrigerators and tubewells for non-agricultural purposes etc. The rated capacity of any motor used in such appliances shall not, however, exceed 4 kilowatts.

8. Industrial:

'Industrial Supply' for the purpose of this Tariff, means a supply for bonafide industrial purposes in factories, and also for water pumps, and tubewells operating on three phase 400 volts other than those meant for the irrigation and reclamation of agricultural land, and includes a supply for lamps and fans required for the offices and for the normal working of the industry upto but not exceeding a total of 5 per cent of the total units consumed for motor power during the month.

9. Agricultural Supply:

Means a supply for Light Irrigation Pumps and/or Tubewells intended solely for irrigation or reclamation of agricultural land or forests and includes supply for lighting of the tubewells chamber which shall also be charged at the above rates.

10. Public Lighting:

Means a supply given to a local body charged with Public Lighting for the purpose of illuminating Public lamps within the area of its jurisdiction.

11. Traction:

The electricity supplied to railways for running trains e.g. Lahore-Khanewal.

12. Bulk Supply:

For the purpose of this Tariff, means a supply given in bulk at one point to:-

- i) Licencee (Lincensed under Part II of the Electricity Act, 1910) for the purpose of further distribution and resale in his area of supply.
- ii) A Non-Licencee (Permitted under Part II of the Electricity Act, 1980) to engage in the business of supplying energy for the purpose of further distribution and resale in his area of supply.
- iii) Other Consumers e.g. Railways, M.E.S., P.A.F., Cantonment Boards and other Government and Semi/Government and approved institutions having their own distribution facilities for the purpose of further distribution within their respective jurisdiction.

13. Tariff 'H':

For one point supply to residential colonies attached to the premises of industrial supply Consumers who have their own distribution facilities with their own colonies (A.C. supply).

a) Includes Gas carried for other companies through Sui Northern System.

b) Decline in gas consumption is almost entirely due to the reduced offtakes of WAPDA's Thermal Power Stations.

Note:- Sui Northern System supplies gas to its consumers not only from Sui field but also from Meyal and Tut fields which are situated near Rawalpindi and are owned by M/s Attock Oil Company.

EXPLANATORY NOTES ON HEALTH SECTION

This section includes annual data supplied by the Statistical Section of the Health Department on the following topics:-

1. Number and Bed Strength of Hospitals, Dispensaries, Rural Health Centres, T.B. Clinics & Basic Health Units-All Institutions and Institutions by Management Classification.
2. Number of Patients Treated in Hospitals, Dispensaries and Rural Health Centres-Total Institutions and Patients Treated in Hospitals by Management Classification.

Coverage. These statistics pertain to institutions administrated by Health Department, Jails Department, Local Bodies, Pakistan Railways, Social Security and Private institutions aided by the Government and located in the province of the Punjab. Information regarding institutions run by Jails Department and Pakistan Railways has been included since 1985. Information in respect of the following departments/sectors is not covered:

- | | |
|-----------------------|---------------|
| i) Federal Government | ii) WAPDA |
| iii) Defence Services | iv) Auqaf and |
| v) Private Doctors | |

The Hospitals and Dispensaries in the Province are required to keep statistics of all the out-door and in-door patients in the 'Abstract Register'. From the information recorded in the 'Abstract Register' and other relevant registers, all types of Health Institutions are required to supply annual statistical returns to the District Health Offices. The information supplied relates to number of patients treated from different diseases, number and types of operations performed etc. The District Health Officers are to submit the Consolidated returns to the Divisional Health Directorates where the information is tabulated at the Divisional level and sent to the Provincial Health Directorate for consolidation at Provincial level.

A health institution is defined as an institution which provides health services i.e. curative and preventive to all/specific classes of the public as out-door or/and in-door patients.

Hospital Hospital is an institution having ten or more than ten beds. This definition will, however, not be applicable where an institution has been particularly named by the Government e.g. Rural Health Centre Mustafabad, Tehsil and District Kasur having eighteen (18) beds has been specified as Rural Health Centre.

Dispensary A dispensary is an institution having less than ten beds.

a) Sharp decrease in employment is mainly due to the following reasons:-

1. Substantial retrenchment of Workers in six factories located in Faisalabad district.
2. Permanent/Temporary closure of some mills in Sargodha, Bahawalnagar and R.Y.Khan districts.
3. Non-coverage of manufacturing establishments which were not registered under Factories Act-1934.

b) As a result of change in the scope of enquiry the establishments falling in the rural areas were not covered.

Note :- The Establishment Enquiry covers all the registered factories and all other civilian Establishments employing 20 or more workers.

**EXPLANATORY NOTES
ON
LOCAL BODIES FINANCE SECTION**

After the promulgation of Punjab Local Government Ordinance 1979, the organizational set-up of Local Government Institutions is as under:-

1. Zila Council for each Zila.
2. Municipal Corporation for each city.
3. Municipal Committee for each Municipality.
4. Town Committee for each town.
5. Union Council for each Union.

Besides, these Local Councils, there are Cantonment Boards, under the Ministry of Defence, Government of Pakistan which perform Local Government functions in the Cantonment areas.

II. SCOPE AND DEFINITIONS OF LOCAL GOVERNMENT INSTITUTIONS AND CANTONMENT BOARDS.

1. 'Zila Council' means a Zila Council constituted for a Zila (District) under the Punjab Local Government Ordinance 1979. It extends over the area of a revenue district excluding its urban areas, Cantonment areas and Federal areas.
2. 'Municipal Corporation' means a Municipal Corporation constituted for a city under the Punjab Local Government Ordinance 1979. The city may comprise an urban area having population exceeding five lac.
3. 'Municipal Committee' means a Municipal Committee constituted under the Punjab Local Government Ordinance 1979. It may comprise an urban area having population of twenty thousand or more save as other-wise provided or notified by the Provincial Government.
4. 'Town Committee' means a Town Committee constituted under the Punjab Local Government Ordinance 1979. It may comprise as urban area having a population exceeding five thousand but not exceeding twenty thousand save as other-wise provided or notified by the Provincial Government.

5. 'Union Council' means a Union Council constituted under the Punjab Local Government Ordinance 1979 comprising a village or number of villages, excluding its urban areas and Cantonment Areas, to be a Union Council provided that a part of a village may be included within the Local area of Union Council.
6. 'Cantonment Board' means a Board constituted under the Cantonments Act, 1924. It would be a corporate body having perpetual succession and common seal with the power to acquire and hold property both movable and immovable and to contract and can sue and be sued on the said name.

III. DEFINITIONS OF ACTUAL, BUDGET AND SANCTIONED/REVISED ESTIMATES ETC.

1. 'Budget' means an official statement of the Receipts and Expenditure of a local council for a financial year.
2. 'Receipts' means receipts from all sources during a financial year and does not include opening balance except in case of newly created Local Councils/Cantonment Boards, which are included for the first time.
3. 'Expenditure' means expenditure on all heads including Development expenditure during a financial year.
4. 'Actual' means actual amount of Receipt and Expenditure of a particular year.
5. 'Sanctioned Estimates' means the statement of Estimated receipts and Expenditure prepared for each financial year to be laid before the competent authority for sanction.
6. 'Revised Estimates' is a statement of the probable receipts and Expenditure framed in the course of the year with reference to the transactions already recorded.

IV. Budget documents of all the Local Government Institutions and Cantonment Boards are collected by the Bureau and total Receipts and Expenditure data is extracted from them whereas total receipts and total expenditure data of Union Councils is collected from the Director General, Local Government and Rural Development Department, Government of the Punjab, Lahore. Data for all types of Local Government Institutions except Union Councils have been presented Division/District/Tehsil-wise alphabetically and

those of Cantonment Boards by Districts so as to enhance its utility. There exist either Municipal Committee or Town Committee in almost every tehsil with the exception of Tehsil Chobara and Tehsil Jand, where no urban unit of Local Council i.e. Municipal/Town Committee, exists. Sahiwal is the only District in the Punjab where there is no Town Committee geographically located.

V. During 1986-87 there were 29 Zila Councils, 7 Municipal Corporations, 64 Municipal Committees, 133 Town Committees, 2367 Union Councils and 18 Cantonment Boards located in the Punjab Province.

VI. It has generally been observed that Total Receipts vary greatly from the Expenditure when we take the Budgets of Local Government Institutions individually. But when receipts and Expenditure of all Local Government Institutions are taken together, variations on both sides cancel out with one another and the resultant difference between the Total Receipts and Expenditure of all institutions are within reasonable limits. This difference between Total Receipts and Expenditure is met either from the reserve funds or from the opening balance. Sometimes sanctioned estimates, given for the first time, for a particular financial year are subsequently substantially changed during the next fiscal year. If Budget of any Local Government Institution or Cantonment Board is not revised for a particular financial year, then sanctioned estimates are repeated.

EXPLANATORY NOTES ON MANUFACTURING INDUSTRIES SECTION

This Section includes statistics on the following topics:-

- i) Monthly Survey of Industrial Production and Employment.
- ii) Annual Census of Manufacturing Industries (CMI).
- iii) Ad-hoc Census of Small and Household Manufacturing Industries (CSHMI): 1975.
- iv) Registered Factories and their Employment by Districts and by Industry.
- v) Industrial Credit.

MONTHLY SURVEY OF INDUSTRIAL PRODUCTION AND EMPLOYMENT

Statistical tables included in this section contain data on production and employment for the years 1976-77 to 1985-86 and monthly data for 1985-86 as well in respect of 29 items manufactured by 17 selected large-scale industries in the Punjab. These industries accounted for about 63% of "Total Value Added" in manufacturing sector in the Province during 1970-71. Employment during the year is monthly average.

This information has been collected through Bureau's Monthly Survey of Industrial Production and Employment which was started in October, 1971. Industry-wise proformas are used for the purpose. Data from non-responding factories is collected by Bureau's Officials through personal visits. The results of the Survey for a month are generally finalized by the end of the following month. Employment data for a factory is shown only once against the industry in which it is classified on the basis of its major products even though it produces more than one item.

Coverage is complete in respect of Cotton Yarn, Cotton Cloth (Mill sector), Woollen and Worsted Cloth, Vegetable Ghee, Jute Textile, Sugar, Cigarettes, Cement, Caustic Soda, Sulphuric Acid, Fertilizers, Paper and Paper Board, Bicycles, Soft Drinks and Juices. Coverage for the remaining manufactured products is specified below:-

1. Woollen Yarn, Knitting Wool and Blankets:- It excludes some units.
2. Leather Tanning:- All Large Tanneries are covered.
3. Footwear:- 14 large and medium size factories including Bata, Service, Basco and Raja are being covered. Production of these factories was about 98% of Footwear Production in registered units of the Province.

4. Steel Re-rolling:- According to Bureau's Establishment Survey of Steel Re-rolling Industry conducted during 1975-76, about 90% of the Production is being covered in the current survey.
5. Diesel Engines:- 23 factories whose production is about 75% of the total production of Diesel Engines are being covered.
6. Electric Fans:- All large and medium size factories are covered.

Steps for Improvement:- To complete coverage in respect of Woollen Textile, Leather Tanning, Footwear, Electric Fans, Steel Re-rolling Industries and Diesel Engines attempts are being made to ensure response from outstanding factories.

Efforts are made to keep the list of factories up-to-date in consultation with Central Board of Revenue, PICIC, ADBP and Directorate of Labour Welfare, Punjab.

Scope of the Monthly Survey of Industrial Production and Employment is being extended to more Industries.

ANNUAL CENSUS OF MANUFACTURING INDUSTRIES (CMI)

This section contains tables on Summary Statistics (Fixed Assets, Employment, Employment Cost, Industrial Cost, Value of Production and Gross Value Added) of registered factories reporting for the annual Census of Manufacturing Industries for the years 1976-77 to 1982-83. The Census is conducted under Industrial Statistics Act 1942, under a co-operative programme shared by Federal Bureau of Statistics, Government of Pakistan; Directorate of Industries and Mineral Development, Punjab and Bureau of Statistics, Punjab with the following distribution of work:-

Federal Bureau of Statistics:

- a) Planning of Census in collaboration with Provincial Bureaus of Statistics and Directorates of Industries.
- b) Preparation of Questionnaire, Tabulation Plan and Editing Instructions in consultation with all concerned Federal Ministries, Provincial Departments and Autonomous and Private Organizations.
- c) Preparation and Publication of CMI tables on national level.
- d) Maintenance of an up-to-date list of manufacturing establishments.

Directorate of Industries and Mineral Development, Punjab:

- a) Notification of the questionnaires.
- b) Printing and mailing out of questionnaires.
- c) Collection of CMI returns.
- d) Preliminary editing of CMI returns.

Bureau of Statistics, Punjab

- a) Statistical examination of CMI Returns.
- b) Computer processing of CMI Returns.
- c) Conducting of Non-response Survey for estimation of data for the establishments not reporting for the Census.

Scope & Coverage:

All factories, carrying on manufacturing or repairing activities and registered under the Factories Act 1934, are covered under the Census. It, however, excludes Defence and other Government establishments including Railway Workshops which provide ancillary facilities and do not manufacture or repair anything for commercial purpose.

Definitions:

Important terms used in the section are defined as under:-

i) REGISTERED FACTORIES

An establishment is said to be registered under Section 2(J) of Factories Act 1934, (Amendment of 1973) if ten or more workers are working on any day of the preceding twelve months and in any part of which manufacturing process is being carried on with or without the aid of power or is ordinarily so carried on, but does not include Mine subject, which comes under the operation of Mines Act, 1923.

ii) GROSS VALUE OF FIXED ASSETS:

It includes the gross value of land, building, machinery, transport and other fixed assets i.e. equipment, furniture etc., as at the end of the year.

iii) EMPLOYMENT:

It is the total average daily employment computed from the monthly employment data reported in CMI returns adjusted for contract labour.

iv) EMPLOYMENT COST:

It includes wages and salaries, cash and non-cash benefits and the amount paid to contract labour.

v) INDUSTRIAL COST:

It includes cost of raw materials, fuel and electricity consumed, and payments made to others for repair, maintenance of building and machinery and processing of establishments materials.

vi) GROSS VALUE OF INDUSTRIAL PRODUCTION:

It includes value of products and by-products, sale-proceeds from industrial waste, receipts for industrial work done and services rendered to others, sale of electricity and value of 'net work in process'. The value of products and by-products includes indirect taxes.

vii) GROSS VALUE ADDED:

This is worked out by subtracting industrial cost from the gross value of industrial production.

Limitations of CMI

1. The mailing list used for the census may not be up-to-date.
2. The reported data contained reporting errors and inconsistencies, which were corrected on the basis of available supplementary information or/and past data.
3. Census results become available with a time-lag of 2-3 years due to the time taken for collection, editing and tabulation processes.
4. Size and nature of non-response varies from year to year. Since non-response survey could not be conducted upto 1980, and Census results were not adjusted for non-response, they may not be comparable from year to year.

The Bureau of Statistics has, during recent years, taken the following steps to improve the Census Results:-

1. List of registered factories is being kept up-to-date.
2. Reported data is subjected to manual as well as computer statistical editing, before final tabulation. Missing information is estimated.
3. The cases, where reporting errors cannot be corrected without changing the reported information significantly, managements of the concerned units are asked to reconcile the discrepancies observed in their data. Corrections are made in the light of their replies.
4. Prior to 1971-72, no information was available to provide a check on reported census information. The Current Industrial Statistics Survey was started in 1971, under which monthly summary data on some aspects of manufacturing activity of important industries is collected. This data which has been shown under Section on Current Industrial Statistics is also referred to during editing of CMI returns.
5. Efforts are being made to complete editing and tabulation as early as possible, after collection of returns by Directorate of Industries and Mineral Development, Punjab.

6. Bureau has planned to conduct non-response survey each year. This survey for 1975-76 to 1980-81 has been conducted and their Survey Reports have been issued. After adjusting the CMI data for non-response, these have become comparable from year to year.

SMALL AND HOUSEHOLD MANUFACTURING INDUSTRIES

Statistical tables included in this section present some summary statistics extracted from the Census Report: 1975-76 on "Basic Statistics on Small and Household Manufacturing Industries", issued by the Punjab Small Industries Corporation, Lahore.

This Census Report provides information about investment on fixed assets, employment and employment cost, value of raw material, fuel and electricity consumed, value of products and by-products, amount of indirect taxes, 'Value added' and various 'capacities'. The Census covered small and household manufacturing units located in urban areas of the Punjab Province (excluding military restricted areas) engaged in manufacturing activity and having investment in fixed assets (excluding land) of the value not exceeding Rs.20 lacs. Repair shops of cycles, watches, televisions, automobiles and such other goods of domestic use were not covered in the Census, but the establishments engaged in repair of products like plant and machinery were covered in the Census. Bakeries attached with hotels and restaurants, pharmacies run by physicians as a part of their clinics and the teeth repair/manufacturing shops were not covered.

The field enumeration work for this Census was started in March, 1975 and was accomplished in 10 months' time. The statistics were collected for the last calendar month ending prior to the date of filling of the questionnaire.

Definitions:

For the purpose of this Census;

"Small Establishments" means an economic unit engaged in a manufacturing activity under a single or joint ownership or control, in one or predominantly one kind of manufacturing activity for economic benefits, at a single physical location; for example, a factory, workshop, mill, etc., the fixed investment limit, thereof, is Rs.20 lacs (excluding the cost of land).

"Household" means a single person living alone or group of related or unrelated persons who normally live and eat together under common cooking arrangements or who normally live together but do not eat together and engaged in a manufacturing activity for economic benefit.

"Manufacturing" means the mechanical and chemical transformation of inorganic or organic substances into new products whether the work is performed by power-driven machines or by hand or whether it is done in factory or in workers home. The assembly of the component parts of manufactured products is also considered as manufacturing.

LIMITATIONS OF DATA:

1. The extent of under-coverage has not been estimated through post-census evaluation survey and the statistical information tabulated had not been adjusted accordingly.
2. Recent extension in the boundry limits of the cities and towns were not taken into account. Almost 30% of the city/town maps used during the census operations were out-dated.
3. Majority of small industrialists and household manufacturers do not maintain proper books of Accounts. The reported data were, therefore, based either on the rough estimates provided by the respondents or the 'assessment' of the Census staff.
4. Investment criterion used to define a Small/Household Establishment has resulted in enumeration of registered units as well. It may be noted that 1527 or 3.9% of the total number of 39033 manufacturing units surveyed were registered manufacturing units. This has introduced an element of duplication in the coverage of two industrial statistics enquiries, viz:-
 - i) Census of Manufacturing Industries (CMI) covering registered factories only.
 - ii) Census of Small and Household Manufacturing Industries (CSHMI) 1975 cover both the registered and un-registered manufacturing units.

The duplication in coverage was mainly encountered in the following major groups of industries:-

	Total Units	Registered Units	Registered Units as percent of Total Units
i) Processing of Agricultural Produce including all Food & Feed Industries	6355	294	4.6
ii) Textiles	11820	743	6.3
iii) Engineering Industries including all metal products, machinery/plants & electrical equipments/appliances	6778	335	4.9

Even though the number of registered units is relatively small yet the value added contributed by these units was substantial. For example, in the "Processing of Agricultural Produce, including all Food & Feed Industries" group, out of 6355 manufacturing units surveyed, 217 were registered Cotton Ginning Factories. These factories contributed a value added of Rs.30263 thousand i.e. 56.5% of Rs.53522 thousand the value added by the group.

Separate tabulations in respect of manufacturing units registered under Factories Act will have to be obtained from basic census records before aggregates of summary statistics about manufacturing sector (Large and Small) can be worked out.

REGISTERED FACTORIES AND THEIR EMPLOYMENT BY DISTRICTS AND DIVISIONS AND MAJOR INDUSTRY GROUPS

Two tables on distribution of registered factories employing persons 'upto hundred' and 'more than hundred' by districts and divisions and major Industry groups and one table giving their employment level as on 30th June, 1985 and 1986 have also been added to indentify the areas of industrial concentration and the type of industrial activity. These tables have been extracted from Bureau's Directories of Registered Factories in the Punjab as on 30th June, 1985 and 1986 (which contain information on names and addresses of registered factories arranged alphabetically within industry alongwith their status of ownership and legality, fixed assests & employment sizes and year of commencement of production).

a) Fall is due to decline in the average number of looms worked owing to less demand and higher manufacturing cost in comparison with Power Loom sector.

b) Closure of additional three weaving sections.

Note:- Decline in employment from 1977-78 to 1985-86 is due to less production of Cotton Cloth, migration of workers to Middle East countries, change over from spindles to rotors and closure of 13 mills during this period.

- a) Decline in production is due to closure of Colony Woollen Mills Ltd. Multan, stoppage of production by Lawrencepur Woollen Mills and less demand as reported by some mills.
- b) Fall in production is due to general slump in the Market and closure of one mill during the year.
- c) Lower production is due to Introduction of Shalwar Kurta in Government Offices by the Government.

EXPLANATORY NOTES
ON
POPULATION SECTION

The first decennial Population Census of Pakistan was conducted during the period from 9th to 28th February 1951, the second from 12th to 31st January 1961, the third from 16th to 30th September 1972 and the fourth from 1st to 15th March 1981. Reference dates of 1951, 1961, 1972 and 1981 Censuses according to Census Reports, were 28th February, 31st January, 10th September and 1st March respectively. Inter-Censal periods have been taken as 10.00 years, 11.62 years and 8.46 years between 1951 and 1961 Censuses, 1961 and 1972 Censuses and 1972 and 1981 Censuses respectively for computation of Growth Rates.

The Population Census Organization released the 1981 Census results according to old administrative set up of the Punjab based on 5 Divisions, 21 Districts and 75 Tehsils whereas the present administrative set up of the Punjab, with the creation of three new Divisions of Faisalabad, Gujranwala and D. G. Khan, comprises of 8 Divisions, 29 Districts and 88 Tehsils.

Tehsil-wise Population for 1951, 1961 and 1972 Censuses for newly created districts of Layyah, Rajanpur, Toba Tek Singh, Bhakkar, Khushab, Chakwal and Khanewal was estimated in this Bureau. The Population data of 1981 Census of the eight newly created districts & their tehsils is provisional.

Tehsil-wise area figures according to new administrative set up were collected from Cartographic Office, Survey of Pakistan, Rawalpindi.

EXPLANATORY NOTES
ON
PRICES SECTION

This section includes data on the following topics:-

1. Index Numbers of Wholesale Prices.
2. Index Numbers of Consumer Prices.
3. Inflation-Rates.
4. Spot Bullion Quotations.
5. Weekly Exchange Rates of U.S. Dollar.
6. Monthly Average Wholesale Prices of Wheat (Maxi-Pak), Rice (Basmati), Kappas (American) and Gram.

WHOLESALE PRICE INDEX (WPI)

Wholesale Price Index Numbers are designed to measure the directional movement of Prices in the Primary and Wholesale markets. Prices used are generally those which conform to the Primary sellers, realizations at ex-mandi, ex-factory or at an organized wholesale level.

Series of Wholesale Price Index Numbers having 201 items with 1959-60 as base was first issued in 1963. Later on a new series with base 1969-70 and enlarged coverage was started in 1977. The number of price quotations in the later series were increased from 201 to 433.

Since 1969-70 some notable changes took place in the country's economy like currency devaluation, increase in prices of petroleum, edible oils, fertilizers, capital goods etc. in international market which affected the price and demand pattern in the country. The price structure also changed by the increased participation of public sector in the direct production activity. Taking account of all these factors the National Accounts Committee decided in a meeting that base year of the various indices computed by Statistics Division (now Federal Bureau of Statistics) should be shifted to the year 1975-76. Accordingly the base year of WPI has also been shifted.

The commodities entering in WPI cover five major groups; (i) food, (ii) raw materials (iii) fuel, lighting and lubricants, (iv) manufactures and (v) building materials. The number of commodities have been increased from 72 to 87 and the number of price quotations from 433 to 625.

For computation of the index numbers Laspeyre's formula has been adopted.

CONSUMER PRICE INDEX (CPI)

Consumer Price Index Numbers are prepared in order to measure the percentage change in the cost of purchasing a constant basket of goods and services of a particular population and during a given period of time.

Series of Consumer Price Index Numbers having 202 items with price base 1969-70 and weight base 1972 was started in 1973. With the availability of new goods and changes in consumer preferences, it was decided to compute a new series of CPI with price base 1975-76 and weight base 1978. The number of items in the latest series have been increased from 202 to 357.

The commodities included in the index numbers cover four consumption groups (i) food, beverages & tobacco, (ii) apparel, textile & footwear, (iii) housing & household operation, and (iv) miscellaneous. Prices entering the index numbers are collected from retail stores and are prices at which retailers sell their goods and services direct to the consumer.

For computation of the index numbers the Laspeyre's formula has been adopted.

RATE OF INFLATION

Rate of inflation can be measured through CPI WPI or implicit deflator of GDP, but the common practice to measure inflation is through CPI though in Pakistan the annual rate of inflation worked out from the three series is very close to each other.
