Understanding America Study**

**Methodology and Select Crosstab Results  
UAS 240 – Wave 3  
May 14, 2020**

### Methodology

On April 1, 2020, USC's Center for Economic and Social Research (CESR) invited all active members of CESR's Understanding America Study (UAS) probability-based internet panel to participate in an ongoing coronavirus tracking survey. This methodology and selected crosstab topline is associated with participants in Wave 3 of the tracking survey, administered from April 15 to May 12, 2020. For a full set of topline results, please visit CESR's [COVID-19 National Results](#) page.

Each panel member was randomized to respond on a pre-assigned day of the week, distributed so that a full sample is invited to participate over a 14-day period. Respondents have 14 days to complete the survey but receive an extra monetary incentive for completing the survey on the day they are invited to participate. Data for the full sample is thus final after a 28 day period. Microdata files are released after each full wave.

Los Angeles County residents answer once a week, alternating between a long form survey which is administered to everyone across the country every two weeks, and a short-form survey administered only to LA County residents every other week. For the subset of long form and short form survey questions that are identical, data for the full LA County sample is final after a 14 day period.

The design creates a sample that is updated daily, shown in corresponding graphs on our tracking survey website [Covid19Pulse.usc.edu](#). These are refreshed just after 3am PST every day of the week. On the site, the viewer can choose to view aggregated results from our national sample, and from our Los Angeles County sub-sample. The graphs may be run for overall results, or among categories of age, race/ethnicity, gender, education, and income, when sample size allows. Results are suppressed for sample sizes less than 100 individuals.

We provide the aggregated data used to create the graphics in csv format, and the graphics files themselves are downloadable in several formats. Survey questionnaires, toplines, microdata files, and a press room are available on our UAS Covid19 data site at [uasdata.usc.edu/page/Covid-19+Home](#)

### Sample information

A total of 6,287 adult residents of the U.S. participated in this survey between April 15 and May 12, 2020 and are included in the data file; an average of roughly 450 per day. Most respondents (96.1%) participated on their assigned day, between April 15 and April 28, 2020. Margin of sampling error for the full sample is +/-1.

Specific sample sizes and sampling error information for subsamples are provided in the topline tables. Sampling error calculations are at the 95% confidence level. Factors other than sampling error may affect results of any survey, including question wording, question order, mode, sample type, population coverage, and impact of current events.

For more information about the UAS panel, including weighting details; panel sampling procedures; recruitment protocols, survey and recruitment response rates; panel attrition rates; panel management protocols; and microdata files (including nonresponse and paradata), please visit the Understanding America Study website at <https://UASdata.usc.edu>.

### Survey and Data

Survey wording and question text are provided in this topline release, but for full wording, please refer to the associated codebook and questionnaire. For most questions, we rotated the order of response options, and/or questions to average out order effects. Respondents participated via computer, mobile device or tablet, at any time of day or night during the field period. The survey was conducted in the respondents' choice of English or Spanish.

Topline reports, codebook, and microdata associated with this release are available to registered UAS users at <https://uasdata.usc.edu/page/COVID-19+Corona+Virus>.

## Survey Weights and Participation Rate

A total of 9,063 panel members were invited to participate in the tracking survey, including 8,547 panel members who were eligible to be included in the weighted sample for tracking poll data releases. Panel members included in the raw data (available upon request) but excluded from the weighted sample were recruited via listed sample for a specific project and are not included in the topline estimates, or in the associated data files. 6,885 panel members had consented to be included in the tracking survey as of the start date of April 15, 2020 and were invited to participate; 6,488 completed the survey, 31 started but did not complete it, resulting in a participation rate of 94.3% for this wave. Two hundred thirty-two participants from the listed sample were not included in this file.

The method for creating sample weights for the tracking survey follows the general procedure for UAS surveys described [in CESR's online methodology documentation](#). Sample weights are constructed in two steps. First, we calculate a base weight that corrects for unequal probabilities of selection of different households into the UAS. Second, we generate post-stratification weights, which align sample distributions of key demographics, namely gender, race/ethnicity, age, education, and geographic location, with their population counterparts. Population benchmarks are derived from the Basic Monthly Current Population Survey (CPS). The provided sample weights bring the sample in line with the U.S. adult population, if the entire sample is used. The sample weights also provide alignment with the population of Los Angeles County residents, California residents excluding Los Angeles County, and U.S. excluding California, if these geographic sub-samples are selected.

## Panel Information

The UAS is an ongoing national research panel that started in 2014. We recruit panel members in waves from Marketing Systems Group frames of all household addresses in the United States. To ensure full coverage of the U.S. population, we provide internet-connected tablets to households that were not already online. Our panel includes U.S. residents who have cell phones, landlines, or no phone at all. It also includes a small number of respondents recruited from a listed sample, these participants are not included in weighted samples. Panel members are compensated for their participation.

## About the Center for Economic and Social Research

The Center for Economic and Social Research (CESR), part of the USC Dornsife College of Letters, Arts and Sciences, conducts basic and applied research in economics, psychology, demography, education, and sociology. The center's name signifies the breadth of the research, which encompasses numerous disciplines, topics and methodologies. The Center's multi-disciplinary philosophy fosters a productive and innovative research environment focused on understanding and informing important societal issues.

## Survey Team

**Arie Kapteyn** Ph.D., is Professor of Economics and the Executive Director of the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Daniel Bennett** Ph.D., is Assistant Professor (Research) of Economics at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Kyla Thomas** Ph.D., is a Sociologist at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Jill E Darling**, MSHS, is Survey Director for the Understanding America Study at the Center for Economic and Social Research at the University of Southern California.

For questions about this survey, please contact [uas-l@usc.edu](mailto:uas-l@usc.edu)

The USC Dornsife Center for Economic and Social Research is a proud member of the American Association for Public Opinion Research's [Transparency Initiative](#). The survey was funded by the USC Dornsife College of Arts, Letters and Sciences.

## Topline Report

**Survey dates** April 15 through May 12, 2020  
**Sample size** 6,287 Adult U.S. Residents

This report provides the sample characteristics for the UAS 240 weighted national sample, as well as brief summaries of responses to the questions included in the UAS 240. Full questionnaires, data and other information are available at [UASdata.usc.edu](https://UASdata.usc.edu).

### National Sample Characteristics

The table below summarizes select characteristics of the full National sample, with and without survey weights.

	National unweighted	National weighted
Male	42%	48%
Age(18-34)	19%	24%
Age(35-54)	38%	38%
Age(55-64)	20%	18%
Age(65+)	23%	20%
Low education (HS or less)	22%	38%
Medium education (Some College)	37%	28%
High education (College degree)	41%	34%
HH income (\$0-24,999)	19%	22%
HH income (\$25,000-49,999)	21%	23%
HH income (\$50,000-74,999)	20%	19%
HH income (\$75,000 and above)	40%	36%
Non-Hispanic White	67%	63%
Non-Hispanic Black	8%	12%
Non-Hispanic Asian	5%	5%
Non-Hispanic Other	5%	4%
Hispanic/Latino	15%	17%

Please refer to the crosstab topline results reported in the attached document for question-specific sample sizes and margins of sampling error. Breakout categories with fewer than 100 respondents have been suppressed. All differences among subgroups reported in media releases that use UAS 240 data are tested for statistical significance.

## Crosstab Release UAS 240 Wave 3: Understanding Coronavirus In America

This release provides demographic and California state results for selected variables from Wave 3 of the Understanding Coronavirus In America tracking survey. Full topline results, question text, data files, and other documents are available from our [Covid National Survey Data site](#).

### 1 COVID-19 Symptoms, Testing, and Medical Care

**cr002:** Have you been tested for coronavirus since [date of previous survey]? If so, what was the result?

	N	MOSE	Tested Positive	Tested Negative	Tested Don't Know Result	Not Tested
<b>OVERALL</b>						
cr002 Tested for COVID-19	6278	+/- 1	0.1	2.0	0.4	97.5
<b>EDUCATION</b>						
HS or Less	1362	+/- 3	0.2	2.4	0.3	97.1

## 12 Payment Questions

The next questions ask you about payments you have made recently. You make a payment any time you give money to someone else, such as when you buy something at a store, pay your rent or mortgage, or order food from a restaurant.

**ca02:** How much cash do you currently have in your pocket, purse or wallet?

	N	MOSE	mean
<b>OVERALL</b>			
ca02 cash currently in pocket, purse, wallet	6204	+/- 1	128.0
<b>EDUCATION</b>

**ins001:** Suppose you already bought a used car. After inspecting the car, an independent agency tells you that the chance the car may be defective within the first year is [random number]. If the car is defective, your only option will be to fix it and you will need to pay \$5,000 to do this. How much would you pay for an insurance policy that would give you back the full \$5,000 to fix the car?
