## REPORT OF KHARIF 2007

**KHARIF:-** Crops sown in late spring or early summer (April- May- June) and harvested in autumn (October-November-December) in Sindh.

### **METHOD OF COLLECTION:-**

For collecting area sown by mode of irrigation Sindh Bureau of Statistics conducts Census of Crops Acreage for Kharif and Rabi season every year. Information is collected through specially designed proforma which are mailed to all Mukhtiarkar in Sindh, Tapedars carry-out physical inspection of survey number in each deh and fill-in proformas. Duly filled in proformas are sent to Bureau's Headquarters by Mukhtiarkars. Follow-up action is taken through correspondence and visits by field staff as well. At head office filled proformas are coded, edited and checked. The data processed on computer and detailed reports are published for Kharif and Rabi seasons. Each deh is assigned a code for the purpose of sorting and processing. Proformas coded, edited and tabulated at district level and taluka level by crops and by mode of irrigation.

### **LIMITATIONS:-**

- i) The response rate for Rabi has been arrived 90% for non responding dehs, figure, of Kharif, 2007 have been reported.
- ii) Current booklet is summary release containing nine(9) pages. The booklet contains information on area sown by mode of irrigation at district level and for important crops only. Earlier reports used to contain information on area sown by mode of irrigation and crop at taluka level.
